

*"The first wealth is health"*

## CAR - Automotive service equipment, 110V- 230V for Independent services and Domestic use

The CAR technology is the Best Choice for Preventive Interior Health Hazards Treatments

The CAR system is one of the most useful unit for independent shops and families with multiple cars. Meets USA/EU compliance and standards to ensure the most efficient level of anti-allergen, sanitizing, and odor removal when it is in use. Safe indoor use, dry scent diffusers, and cold plasma are just some of the technological advancements. Easy automated use ensures the delivery of high-quality treatments.

CAR trioxygen gas generator, meets the requirements of the following directives: OSHA,NIOS EPA-451/K-03-001 compliance, DIRECTIVE 2006/95/EC , 2004/108/EC and the relevant harmonised standards as proven by applicable EC Certificates and validated tests.

Techninal advantages:

- Techninal advantages:
- CAR Technology is: organic, dry, chemical and residue-free and fully automated process
- Removing environmental and general life-related health hazards while driving has a significant impact on well-being
- Cold Plasma technology the most efficient trioxygen gas producer
- Helps for people with sensitivity toward allergies
- Does not harm interior surfaces or electronic component
- DSA-Dry Scent Atomizer, LED powered 100% natural ingredients
- An accredited laboratory has verified that the CAR system reduces pathogens to meet sanitizing standards.
- Recommended frequency (by multiple international agencies) twice per year
- Equipped with electronic trioxygen gas destructor
- Trioxygen fault indicator
- OSHA approval for indoor use
- Installation time less than 2 minutes
- No other consumables needed for operation

CAR Technology does not contain inorganic chemicals or residues which could cause allergy reaction or cause changes in materials. The CAR process is a Residue -Free process and laboratory verified for treatment efficacy. Meets OSHA workers safety rules and allows the CAR unit to be used in the service bays or in garages while performing other tasks. This prevents the spread of health-hazard oxidants in the air. Performing dry scent diffusion (DA) is an essential part of every treatment cycle.

Safety: Marvelzap Technology is a leader in decontamination and automation technologies that complies with OSHA and EU-OSHA worker safety regulations.

- 1,Proof of Treatment label  
2, Fan for interior surface treatment

Hose for A/C system treatment

### Technical Data

Model:CAR

Housing: Non corrosive metal

Fan Airflow 125 (m<sup>3</sup>/hr)

Noise level: (db)30

Power rating: 65Watts / 110V/60hz, 220-240 V, 50 hz

Trioxygene output: 2500-3200mg/hour

Trioxygene cell life: 12000-14000 hours

Operating programs: 3

Power cord length:1.5 meters

NetSize: (wxdxh) 29x22x18 cm

NetWeight 5.2 kgs

Sanitizing Efficiency 99.00%

Vehicle coverage: Cars & Vans up to 9 passengers

Proof of Treatment labels, DSA-LED BULB (replacement available)

Proof of Treatment label  
I (no marking self adhesive)

Attention: Sales to California is restricted. In advance CA State classifying permit must be submitted with proof of use.
